## Ways to Write a Number

(Place Value Practice)
There are 4 different ways to write a number.
Let's practice below!

| Digits/       | Picture  | Number Name                                      | Expanded Notation/ |
|---------------|--|--|--------------------|
| Standard Form | (Hundreds, Tens, Ones)                         | With Words                                       | Expanded Form      |
| 45            |  | Forty Five                                       | 40 + 5             |
|               | EXAMPLE<br>You can view and<br>copy after down | PAGE! "clean" d print a "clean" loading! Thanks! |                    |
|               |  |  |                    |

|               |                                     |             |                                     |

## Thanks for downloading this chart!

Feel free to copy it double sided, or even scale it down for easier use! I know, as a teacher, we want to practice more than just 5 times with our students! Please remember this download is for use by one teacher only, though. Thanks for your understanding.

I use this chart throughout the year to teach \noting to keep "spiraling" place value! Enjoy!

~Jillian!
