Cupcake Bakery

Sweet Delights had 93 strawberry cupcakes. They baked 46 more. How many strawberry cupcakes does Sweet Delights have now?

$93 + 46 = \square$

Base ten blocks showing 93 (9 tens rods, 3 ones units) plus 46 (4 tens rods, 6 ones units) equals 139 (1 ten rod, 3 tens rods, 9 ones units).

Standard form addition:

$$\begin{array}{r} 93 \\ + 46 \\ \hline 139 \end{array}$$

139 Strawberry Cupcakes

CHECK WORK

Standard form subtraction:

$$\begin{array}{r} 139 \\ - 46 \\ \hline 93 \end{array}$$

Directions

1. Divide class into groups (I keep my students in their table groups of 4-5 students).
2. Select a problem that matches the type of problem that you want kids to work on independently (ex. Adding together, taking apart, comparing).
3. Make enough copies for each group to have one problem. Paste or staple the problem on a half sheet of chart paper or a large piece of construction paper.
4. For problems with blanks, tell students to write a name of their choice.
5. Allow time for groups to work through all problem solving steps (I have mine posted and look for evidence of each step as I circulate).
6. While circulating ask questions that guide students to understand errors and explain their thinking.
7. Select one group that has a good understanding of the problem to share their strategy with the class.
